SUMMARY

Innovative web and app developer currently pursuing a bachelor's degree. Passionate about tech advancements and keen on contributing to forward-thinking projects. Seeking internships to harness skills and fuel digital innovation.

PROJECTS

Real-Time News Aggregator

[Links](#)

Built a dynamic news web application using **HTML, CSS, JavaScript, and Bootstrap**. This application fetches news articles from a freely available online source (API) and displays them on the fly, ensuring users have access to the latest headlines

Comprehensive Fitness Web Application

[Links](#)

Designed and developed the user interface: Led the creation of the intuitive and user-friendly interface for Muscle Force, incorporating **React JS, and tailwind css** to ensure seamless navigation and optimal user engagement

Farm-to-Table E-commerce Platform

[Links](#)

Developed farm.io, an innovative web application featuring an intuitive user interface facilitating seamless interaction with farmer profiles and enabling convenient ordering of a diverse range of fresh produce, including green vegetables, eggs, meat, and fruits.

SKILLS

Web Technologies

React js, Javascript, Tailwind CSS, Bootstrap, HTML, CSS

Mobile App Technologies

Flutter, Firebase

Tools

Git , Github , Terminal, Android Studio , Vs Code , Chatgpt

EDUCATION

2023 - 2025	Bachelor's of Science (Information Technology)	(CGPA: 7.55/10.0)
2020 - 2022	Class 12th (CHSE)	(7.16/10.0)
2020	Class 10th (BSE)	(6.66/10.0)

ACHIEVEMENTS

Participated in Nirman hackathon, where I collaborated with a team to create a fitness web application which anyone can calculate their bmi and calories to intake and several more features within 15 hours time period .

Joined in e-summit hackathon, hosted by SOA university, where we build a farm to table agricultural platform to connect farmers and the customer which they can buy or sell fresh veggies and meat in a short time period . This is done in just 24 hours time limit .
